PROFESSIONAL SUMMARY

Software Engineer with 2 years of experience in Java and Spring Boot, specializing in backend application development and RESTful API design. Experienced in developing enterprise applications, troubleshooting production issues, implementing enhancements, performing testing, and supporting deployments. Proficient in MySQL, Object-Oriented Programming, and Data Structures & Algorithms, with 250+ coding problems solved. Passionate about building scalable, reliable, and maintainable software solutions.

TECHNICAL SKILLS

Backend: Java, Spring Boot, REST APIs

Database: MySQL

Tools: VS code, Git, Bitbucket, Jira

AI Tools: Claude, ChatGPT, GitHub Copilot

Concepts: Object-Oriented Programming, Collections Framework, Exception Handling, SDLC, REST Architecture, Database Design, Data Structures & Algorithms

WORK EXPERIENCE

Assistant System Engineer - Tata Consultancy Services (Client: PayPal)

July 2024 – Present | Chennai

- Developed and maintained internal enterprise applications using **Java** and **Spring Boot**.
- Implemented onboarding workflows for new alerts, enabling efficient monitoring and notification management across applications.
- Designed, enhanced, and maintained **RESTful APIs** to support application functionality and business requirements.
- Investigated, analyzed, and resolved application defects, improving system reliability and user experience.
- Performed end-to-end testing of alert workflows to validate alert generation, processing, and notification delivery.
- Contributed to the development and enhancement of an email triage application by implementing bug fixes and workflow improvements.
- Participated in **deployment** activities and post-deployment validation to ensure successful application releases.
- Worked with **MySQL** databases for data validation, troubleshooting, and application support activities.
- Utilized **Git** for source code management and collaboration within development teams.

Firmware Engineer Intern — NXP Semiconductors

August 2023 – June 2024 | Bangalore

- Contributed to firmware development for Ultra-Wideband (UWB) FiRa systems using **C programming**.
- Performed debugging, validation, and troubleshooting of embedded systems to improve system stability.
- Analysed and resolved firmware issues, contributing to enhanced performance and reliability.
- Collaborated with cross-functional teams during development, testing, and validation phases.

PROJECTS

Mini-Mart Management System | Java Swing, MySQL

- Developed a desktop application for supermarket management including inventory tracking, seller management, and billing operations.
- Automated billing and product management processes to improve operational efficiency.

Travel and Tourism Website | HTML, CSS, JavaScript, PHP, SQL

- Built a web-based platform that enables users to explore destinations and book travel tickets.
- Designed user-friendly interfaces and implemented booking management functionality.

Bus Safety Management System | Java Swing, MySQL

- Developed an application focused on child travel safety during bus journeys.
- Implemented automated email notifications that share conductor details with parents when tickets are issued for minors.

ACHIEVEMENTS

- Solved 250+ problems on Coding Platforms.
- Secured a 100% scholarship at VIT Vellore through the prestigious 'STARS' scheme from 2019 to 2024.
- Recipient of the National Means Cum-Merit Scholarship (NMMS) award, receiving a scholarship valued at over 48,000 INR.
- Achieved the 'School 1st' position in Higher Secondary Education.
- Attained a 4-star rating in Java and SQL on HackerRank.
